SAB GROUP

SAB GRUB

SAB Satellite was founded in the Netherlands and started operating in 2002 under SAB Trading BV. SAB sells satellite receivers, satellite dishes , installation materials and accessories, LNBS, coaxial cables, multi switches, DiSEqC switches, motors and related products.

In 2004 SAB started production activities in cooperation with SAB ELEKTRONIK A.Ş. in Turkey. With its innovative philosophy the company has made multiple investments and increased its capacity. Since 2008 SAB ELEKTRONIK A.Ş. runs its activities from its own modern factory.

To meet customer requests the factory has availability of R & D, moulding facility, fully automated galvanize and zinc phosphate with electrostatic powder coating units onsite.

By innovating its technology and by increasing its facilities and access to foreign markets SAB has grown its competitiveness worldwide. SAB Satellite is now producing under its own brand “SAB” or OEM the following product groups.

Offset satellite dishes in various sizes (> 200.000 pcs/month)

Satellite dish mounting materials (> 200.000 pcs/month)

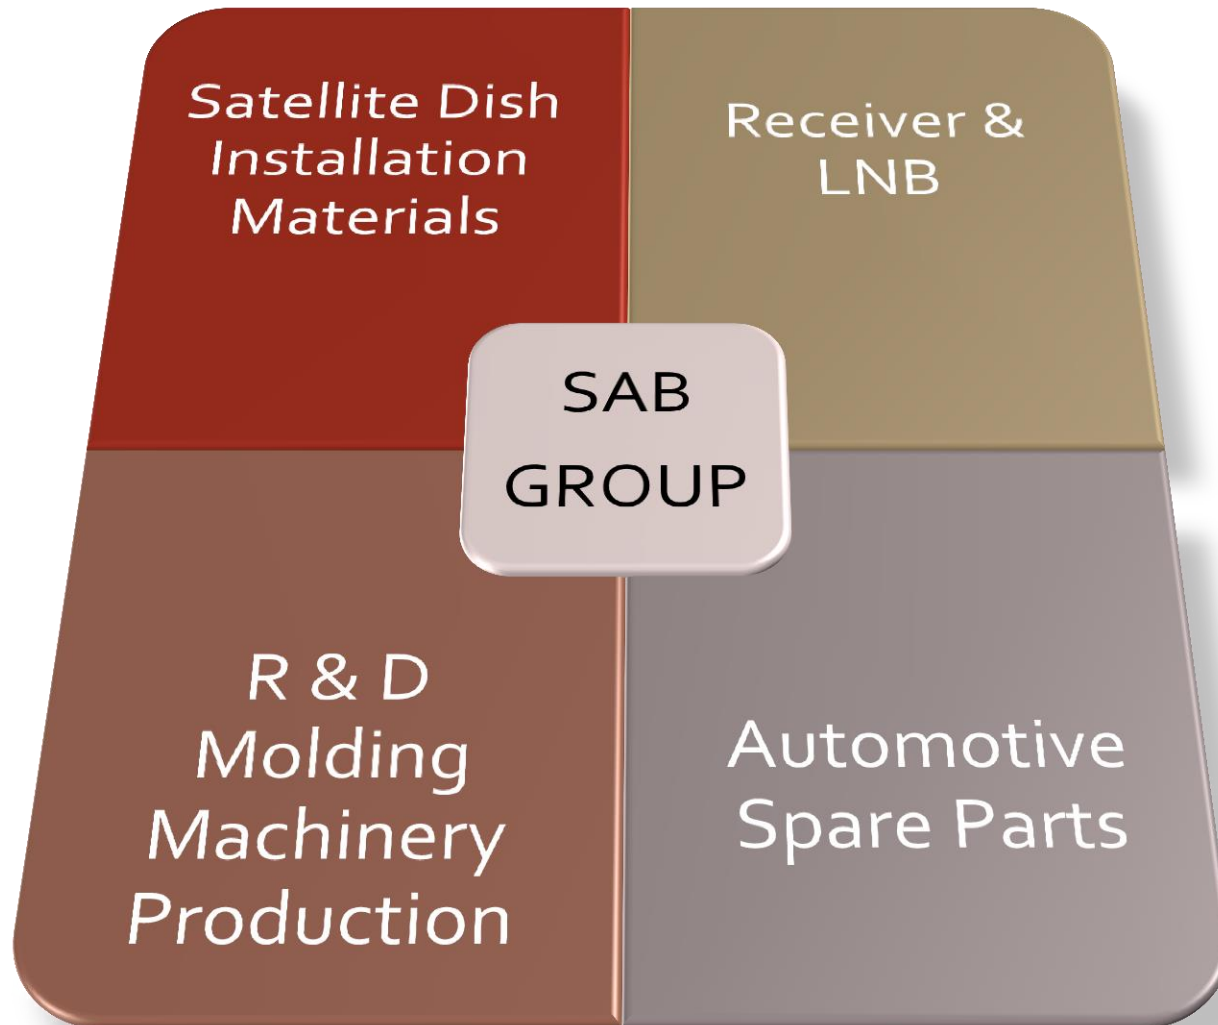

Satellite dish accessories (> 200.000 pcs/month)

SAB satellite dishes are one of Europe's best quality dishes. This is widely accepted both at home and abroad.

Over 90% of our production is exported. The main export countries are; throughout Europe with its core business in The Netherlands, Germany and Belgium, the Middle East and Africa.

As a result of its business development activities SAB group 2013 has decided in 2013 to start production of automotive spare parts.

SAB GROUP

SAB ELEKTRONİK A.Ş

- ❑ SAB ELEKTRONİK A.Ş was founded in 2004 and manufactures offset satellite dishes in various sizes, satellite dish mounting materials and satellite dish accessories.
- ❑ The factory is based in Konya, TURKEY. The factory has a 12.000 m² area with a 7.000 m² production area.
- ❑ Within there is availability of R&D, molding and dish shaping facilities, welding automation line and fully automated galvanize and zinc phosphate with electrostatic powder coating units

SAB ELEKTRONİK A.Ş

SAB ELEKTRONİK A.Ş production groups:

- * Satellite dishes (aluminum or steel)
- * Floor Mounting (aluminum or steel)
- * Plastic Accessories

R & D Mould and Machinery Production Division Members

□ SAB GROUP gives high importance to R&D activities. Therefore a R&D department has been formed internally. This group is composed of more than 10 staff members.

The R&D Department

- ❑ The R&D department carries out design and improvement work for the automotive spare parts, the satellite dishes accessories in production and the hydraulic presses. Completed designs of moulds and machinery are being manufactured by the onsite machines. Examples of these are;
- ❑ Double Column CNC Milling (3000x1500x1070mm)
- ❑ CNC Milling (1250x650x500mm)
- ❑ Wire EDM
- ❑ CNC Lathe (14 ')
- ❑ Surface Grinding
- ❑ Mills
- ❑ Lathe machines and other necessary equipment.
- ❑ Newly developed designs in our R&D department are protected by patents.
- ❑ Our two R&D projects have been recognized and supported by government agencies (Mevka, TUBITAK).

Dish (plate) Forming Line

Due to its production SAB ELEKTRONIK A.Ş has great knowledge and experience regarding dish plate forming. In this line we have different hydraulic, eccentric presses with different power ranges as well as robots which are used in manufacturing automation.

- Hydraulic presses

400 tons & 250 tons & 200 tons & 120 tons & 100 tons & 80 tons (2 units) & 60 tons & 40 tons (3 units)

- Eccentric presses

300 tons & 160 tons & 150 tons & 80 tons (2 units) & 40 tons & 25 tons & 10 tons (2 units)

- Special machines

Robots

□ Industrial Robots

- YASKAWA - Motoman brand

Electrostatic Powder Coating Facility

- ❑ SAB ELEKTRONIK A.Ş has a surface coating - electrostatic powder coating facility where the products are coated with zinc phosphate trication with a 2m/min speed.
- ❑ In continuation of the surface electrostatic powder paint coating there are 2 painting units for different colors of paint and a baking unit.

Welding Line

- ❑ The welding processes are carried out by staff members with welding expertise in gas and argon welding in our automated welding line.

Galvanizing Facility

- ❑ SAB ELEKTRONIK A.Ş has a fully automated electro galvanizing facility on-site.
- ❑ In this facility we can zinc coat all products that need galvanizing.

Packaging Unit

- ❑ Automatic screw kit preparation
- ❑ Automatic set packaging

SAB HOLLAND

- ❑ SAB Satellite was founded in The Netherlands in 2001 and has since grown to a very successful European company.
- ❑ SAB has a wide range of products like satellite receivers, dishes, Inbs and steel products.
- ❑ All satellite receivers are under our own protected “SAB” brand with a 2 year warranty. We are well known for our excellent technical support. We provide support in Dutch, English, Turkish, German and Russian.
- ❑ SAB has multiple distributors in more than 35 countries worldwide

Sales Office / The Netherlands

Quality Management System

- ❑ In all stages leading up to the final product the following quality approach was adopted and established by SAB ELEKTRONIK A.Ş.;
- ❑ Ensure continuity of customer satisfaction,
- ❑ Continuously improve product quality by taking into account the demands and expectations of customers,
- ❑ Use our resources efficiently and effectively,
- ❑ To follow and to invest in technology,
- ❑ International quality requirements of ISO 9001 are being fulfilled, certified and continuously improved.
